Conservation Support ➤ District Technical Assistance (ISWCC)

This project included the collaboration of PSWCD, Lava Foundation, The City of Lava Hot Springs, the Bannock County Civitan as well as the business owners in Lava Hot Springs. These groups came together for a common purpose to address water quality issues & public safety created accessibility to a more diverse population as well as making the area more enjoyable to all. Restoration of this area eliminated approximately 30 tons of sediment per year from entering the Portneuf River. This project focused on Stream Bank Restoration on the Portneuf River. It also focused on access control, improved trail ways and walkways, fencing of the riparian areas, and a floating dock and observation deck.

Tracker tells stories at a broad-brush level. Individual project performance measures and expenditures should not be relied upon for complete and total accuracy and should be confirmed with a project's lead implementer. Project locations subject to confidentiality provisions under state and federal law specify the location of a local conservation district or USDA service center office.
